Abstract—Open-source software development is praised by an increasing amount of big technology companies. The outcome of open-source development is however problematic to the developers themselves. Free software solves tackles these problems.

Index Terms—free software, open source, libre software

I. Introduction

Open-source software development is praised by an increasing amount of big technology companies. The outcome of open-source development is however problematic to the developers themselves [1].

II. Methods

III. Results

IV. Discussion
